

Newbetes

Taking Diabetes One Poke at a Time!

This peer to peer connection for newly diagnosed kids and their parents seeks to soften the impact of being diagnosed with diabetes. There is life after diagnosis and DYS teens and their parents are reaching out to their peers newly diagnosed with diabetes -- the "Newbetes"-- to show them in a positive way that everything will be all right! Someone to talk to is so important as youth find ways to manage this new challenge.

Would you or someone you know like the opportunity to meet other families who also have diabetes? Just contact DYS at 419-887-8739 or info@dys4kids.org and we will connect you with one of our local Newbetes families!
